**A. NEW 9"x12" PROformance** - Use to increase detection depth and scanning width for hunting a broad range of targets. 2221900

**B. 4.5" ACE Sniper** - Use when searching for small, shallow targets in trashy or tight places. 2221800

"I've been hunting about 37 years and I recently went to a field where an open hunt was held about 8 years ago. I've hunted the site with one of your competitor's metal detectors, a \$900 unit, and only found several dimes, so I figured the field was about hunted out. After I bought my ACE 250, I decided to give the field another try. I thought it would be a good test for the 250. So far I've dug 69 silver dimes and quarters and I'm not even finished! Some of the dimes were 6 inches deep and on edge. The ACE 250 is a great little machine. Congratulations on a winner!"
